On the cover: Weight-Loss weighfeeders are shown metering various dry solid ingredients into the company's model 301 continuous blender for a gravimetric feeding and blending pilot production test conducted for an international specialty plastics compounder. Model 405-105X weighfeeder is feeding colored pellets, model 407-101 weighfeeder is feeding fiberglass, model 405-BDF1 weighfeeder is feeding regrind, and model 405-170-0 weighfeeder is feeding an additive. Weighfeeders ensure accurate metering and blending of the ingredients, and the blender provides thorough mixing, producing a consistent final blend.
