On the cover: Model 402X-170-2-2 loss-in-weight weighfeeder is shown installed in supplier's Moonachie, N.J., demonstration facility. Weighfeeder is shown metering a chopped flake material into a collection hopper during a customer-witnessed test for a weighbatching application. Weighfeeder uses two independently driven metering augers to provide high and low feed outputs. Weighfeeder's dual-auger metering mechanism can yield a wide throughput range, with a turndown ratio of more than 100 to 1. Courtesy of Acrison, Moonachie, NJ, 800-422-7476 (www.acrison.com).
