

Designed for rapid removal of all major components via the use of captivated knobs on swing bolts and quick-acting clamps, Acrison's rugged-duty, self-emptying Model BDFM Volumetric Feeder with quick disassembly/reassembly construction is capable of metering a wide variety of dry solid ingredients at feed rates ranging from 0.0006 to 6 cubic feet per hour.

This particular model dry solids feeder utilizes Acrison's triple auger/agitator mechanism (operating at dissimilar speeds) to provide positive flow-inducing internal agitation while simultaneously metering the product with a high degree of volumetric precision and mechanical reliability. As standard, the Quick Disconnect Model BDFM Volumetric Feeder includes all 304 stainless steel product contact surfaces for optimum durability and longevity.

In addition, the Model BDFM Feeder is also utilized with Acrison's compact Models 406 and 407 "Weight-Loss-Differential" Weighing Systems to produce highest possible metering accuracies at the lowest possible feed rates.

The Model BDFM Feeder has base dimensions of 14" X 23 1/2" and weighs approximately 150 lbs. Please reference Acrison Equipment Data Specification 1-200-0482 for further information.
